## Gluten-Free Eating

## Why This Diet is Important

Gluten is a general name for the storage proteins (prolamins) found in wheat, barley, rye and related cereal grains - triticale, spelt and kamut. If you have celiac disease (CD) or dermatitis herpetiformis (DH), a skin form of celiac disease, even a small amount of gluten is harmful. In CD, gluten damages the small intestine resulting in poor absorption of nutrients. In DH, gluten causes skin rashes and itching and also damages the small intestine. A strict gluten-free diet (GFD) is the only treatment for CD \& DH and requires the lifelong elimination of all foods containing wheat, barley, rye, related cereal grains and commercial oats. A GFD will help your small intestine to heal and will eventually result in elimination of the symptoms, which can include: diarrhea, constipation, stomach pain, weight loss, tiredness, low iron levels and the skin rash in DH. The diet also reduces the risk of developing osteoporosis, reduced fertility, lymphoma and potentially other autoimmune disorders. Even if you are symptom free, you must follow the diet to reduce the risk of these long-term complications.

This information is to help you get started on a gluten-free diet. It is still necessary that you meet with a registered dietitian who specializes in celiac disease and seek help from support groups such as the Canadian Celiac Association - www.celiac.ca.

## The Story on Oats

The storage protein in oats, called avenin, does not appear to be toxic in CD. Traditionally, oats have been restricted in the GFD because commercial oats can be contaminated with wheat, barley, rye and related cereal grains. Health Canada and the Canadian Celiac Association have developed a position statement on oats indicating that pure, uncontaminated oats, now available in Canada, are safe in moderate amounts for the majority of people with CD. A small number of people with CD may not tolerate even pure, uncontaminated oats, but the reason for this is unknown. Discussions with your physician and registered dietitian are recommended before introducing pure oats into your GFD.

## Cross-Contamination

When preparing gluten-free food, you must be careful to avoid cross-contamination with gluten. This is true both at home and when eating food away from home. Even very small amounts of gluten can cause damage to the intestine and/or the skin. You will need your own toaster and containers for condiments such as peanut butter, margarine and jam. All meal preparation surfaces including cutting boards, utensils, pots and pans must be clean and free from gluten before you prepare a gluten-free meal. Cross-contamination can also occur in bulk food bins, restaurants (e.g. deep fried foods cooked in oil used for frying breaded products), and in food manufacturing plants. The Canadian Celiac Association has information on cross contamination in its New Members Kit.

## Gluten Containing Foods and Ingredients

Atta (chapatti flour)
Barley (flakes, flour, pearl)
Beer, ale, lager
Breading and bread stuffing
Brewers yeast
Bulgur
Communion wafers
Couscous
Croutons
Dinkel (also known as spelt)*
Durum*
Einkorn*
Emmer*

Farina
Farro or Faro (also known as spelt)*
$\mathrm{Fu}^{* *}$
Graham flour
Hydrolyzed wheat protein
Kamut*
Malt, malt extract, malt syrup and malt flavouring
Malt vinegar
Malted milk
Matzoh, matzoh meal
Modified wheat starch

* Types of wheat
** A dried gluten product derived from wheat that is sold as thin sheets or thick round cakes. Used as a protein supplement in Asian dishes such as soups and vegetables.
*** Unless they are from pure, uncontaminated oats
**** A meat-like food derived from wheat gluten used in many vegetarian dishes; sometimes called "wheat meat".

## Quick Guide to Hidden Sources of Gluten

There are many hidden sources of gluten. Always read food labels. A registered dietitian can teach you about hidden sources and what to look for when reading food labels. The Canadian Celiac Association's Pocket Dictionary of Ingredients is an excellent guide to help determine if a food is gluten-free or not. Listed below are some hidden sources of gluten.

Beer, ale, lager
Broth, soup, soup bases
Candies (Smarties® in Canada), some chocolates, some chocolate bars and licorice
Flavoured coffees and teas
Hydrolyzed plant protein and/or hydrolyzed
vegetable protein (if from wheat, or the source is not mentioned, are not allowed).

Imitation bacon bits and imitation seafoods Medications (check with your pharmacist)
Modified food starch (if source is not identified)
Sausages, hot dogs, deli meats
Sauces, marinades, gravies
Seasonings
Soy sauce

Notes on "Foods to Question"

| Category | Food Products | Notes |
| :---: | :---: | :---: |
| Milk and Alternatives | Cheese spreads or sauces (e.g. Nacho), seasoned (flavoured) shredded cheese | - May be thickened/stabilized with wheat flour or wheat starch <br> - Seasonings may contain hydrolyzed wheat protein, wheat flour or wheat starch |
|  | Flavoured or frozen yogurt | - May contain granola, cookie crumbs or wheat bran |
| Grain Products | Buckwheat flour | - Pure buckwheat flour is gluten-free <br> - Sometimes buckwheat flour is mixed with wheat flour |
|  | Rice and corn cereals | - May contain barley malt, barley malt extract or barley malt flavouring |
|  | Buckwheat pasta | - Some "Soba" (Japanese noodles) contain pure buckwheat flour which is gluten-free but others may also contain wheat flour |
|  | Seasoned or flavoured rice mixes | - Seasonings may contain hydrolyzed wheat protein, wheat flour or wheat starch or have added soy sauce that contains wheat |
|  | Multi-grain or flavoured rice or corn cakes or rice crackers | - Multi-grain products may contain barley and/or commercial oats <br> - Some contain soy sauce (may be made from wheat) or seasonings containing hydrolyzed wheat protein, wheat flour or wheat starch |
| Meat and Alternatives | Baked beans | - Some are thickened with wheat flour |
|  | Imitation fish products (e.g. surimi, imitation crab) | - May contain fillers made from wheat starch |
|  | Seasoned or dry roasted nuts or seeds | - May contain hydrolyzed wheat protein, wheat flour or wheat starch |
|  | Processed meat products: Deli or luncheon meats, hot dogs | - May contain fillers made from wheat <br> - May contain seasonings made from hydrolyzed wheat protein, wheat flour or wheat starch |
|  | Meat substitutes (e.g. vegetarian burgers, sausages) | - Often contain hydrolyzed wheat protein, wheat gluten, wheat starch or barley malt |

## Gluten-Free Substitutions for Wheat Flour

Substitutions for 1 tablespoon ( 15 ml ) Wheat Flour

| $1 \frac{1}{2}$ tsp | Arrowroot starch | 7 mL |
| :--- | :--- | ---: |
| $11 / 2 \mathrm{tsp}$ | Cornstarch | 7 mL |
| $11 / 2 \mathrm{tsp}$ | Potato starch or flour | 7 mL |
| 1 tbsp | White rice flour | 15 mL |
| 1 tbsp | Tapioca starch or flour | 15 mL |
| 1 tbsp | Bean flour (garbanzo/chickpea) | 15 mL |
| 2 tsp | Quick-cooking tapioca | 10 mL |
| $11 / 2 \mathrm{tsp}$ | Gelatin powder (unflavoured) | 7 mL |

## Gluten-Free Flour Mix

1 cup of this mixture can replace 1 cup of wheat flour in a recipe.

| 4 cups | White rice flour | 1000 mL |
| :--- | :--- | ---: |
| $11 / 3$ cup | Potato Starch | 325 mL |
| 1 cup | Tapioca flour | 250 mL |

Sift ingredients together and store in an airtight container. Refrigerate for longer storage periods.

A Gluten-Free Baking Tip
When first learning to bake gluten-free products use well-tested recipes from a gluten-free cookbook.

This information is not meant to replace advice from your medical doctor or individual counseling with a registered dietitian. It is intended for educational and informational purposes only.

Sometimes it is difficult to change a regular recipe to a gluten-free recipe. You may need to try a few times with different gluten-free flours to get it to work well. New healthy mixes often make a better quality product.

Try this mixture to replace one cup of wheat flour:

| $1 / 2$ cup | sorghum flour | 125 mL |
| :--- | :--- | ---: |
| $1 / 2$ cup | bean flour | 125 mL |
| 2 tbsp | tapioca starch | 30 mL |

You may also need to change the amounts of baking powder, baking soda, yeast and sugar to make an old recipe work. Start with the amounts in the original recipe and change one ingredient at a time.

Source: Canadian authors Donna Washburn and Heather Butt. Complete Gluten-Free Cookbook: 150 GlutenFree, Lactose-Free Recipes, Many with Egg-Free Variations. 2007. Reprinted with permission.

There are many food manufacturers that make a wide variety of gluten-free breads, pastas, cookies and other items. There are also numerous gluten-free cookbooks and resource books available.
