About the Arizona Center for Integrative Medicine

The Arizona Center for Integrative Medicine leads the transformation of health care by creating, educating and actively supporting a community that embodies the philosophy and practice of healing-oriented medicine, addressing mind, body and spirit. Integrative medicine is healing-oriented and makes use of conventional and alternative therapies as appropriate. Since its inception, the Center has focused its efforts on three areas: education, clinical care and research, with the primary emphasis on education. We built the Center on the premise that the best way to change a field is to educate the most gifted professionals and place them in settings where they can, in turn, teach others.
